

SUNDRAM FASTENERS LTD., (AUTOLEC DIVISION PLANT-II) GUMMIDIPOONDI-601201

FIRST PIECE SAMPLE INSPECTION REPORT

PART NUMBER : WPA 887M6 WATER PUMP ASSEMBLY

SL.No	Parameter	Specification	DATE														
			SHIFT														
			Method of checking	ACTUAL READING													
1	Spigot diameter	83.940 ~ 83.988	SNG														
2	Mounting hole diameter	8.80 ~ 9.20	Plug gauge														
3	Thread	M8x1.00	Thread plug gauge														
4	Leak test	No bubbles	Leak test machine														
5	Bearing bore dia	29.950 ~ 29.970	Air gauge														
6	Seal bore dia	36.449 ~ 36.474	Air gauge														
7	Seal working height	6.55~6.85	Special gauge														
8	Bearing push in load	Min 700 Kg	MMI														
9	Gear ID	15.859~15.872	Air gauge														
10	Height from Mounting face to Gear Bottom face	25.70 ~ 26.30	2D height guage/Special gauge														
11	Gear push in load	750~1150 KG	MMI														

12	Gear Face out	0.10 Max Controlled Dimension	Special gauge														
13	Impeller ID	15.870~15.884	Air gauge														
14	Impeller push in load	Min 700 Kg	MMI														
15	Impellor Gauge Height at Gauge dia 65.50-(4 holes Impellor)	Controlled Dimension 42.30~42.60 (42.30 ~ 42.70)	Special gauge														
16	Rotation	Free & Smooth	Manual														
17	Seal leak test	6cc @ 1.9bar	Leak testing equipment														
18	Rotational torque	6 kgf-cm Max.	Torqua meter														
19	Batch code	As per M&M batch code format	Visual														
20	Appearance	Free from sharp corners,damage, dent & other defects	Visual														
21	Gear pullout load	750~1150 KG	Load cell														
		First piece	OK / NOT OK
